Energy and Power 1

1.1 Energy

Continuous

Discrete

$$E_{\infty} = \int_{-\infty}^{\infty} |x(t)|^2 dt \qquad (1)$$

$$E_{\infty} = \sum_{-\infty}^{\infty} |x[n[|^2$$
 (2)

1.2 Power

1.2.1 For non Periodic Signals

Continuous

Discrete

$$P_{\infty} = \lim_{T \to \infty} \frac{1}{2T} \int_{-T}^{T} |x(t)|^2 dt \quad (3) \qquad P_{\infty} = \lim_{N \to \infty} \frac{1}{2N+1} \sum_{-N}^{N} |x[n]|^2$$

$$P_{\infty} = \lim_{N \to \infty} \frac{1}{2N+1} \sum_{-N}^{N} |x[n]|^2$$

1.2.2 For Periodic

$$P = \frac{1}{T_o} \int_{-\frac{T_o}{2}}^{\frac{T_o}{2}} |x_p(t)|^2 dt$$

where T_o is The Fundamental Period

Signal Decomposition $\mathbf{2}$

$$x(t) = Evx(t) + Odx(t)$$

With

$$Ev\{x(t)\} = \frac{1}{2}[x(t) + x(-t)] \qquad Od\{x(t)\} = \frac{1}{2}[x(t) - x(-t)]$$

3 Notes

- A Power Signal is signal its power is finite
- An Energy Signal is signal its energy is finite

3.1 From Euler Formula

$$e^{jx} = \cos x + j\sin x$$
$$|e^{jx}| = |\cos x + j\sin x| = \sqrt{\cos^2 x + \sin^2 x} = 1$$

3.2 Unit step function

$$u(t) = \begin{cases} 0, & t < 0 \\ 1, & t > 0 \end{cases}$$
$$|f(t)u(t)| = f(t) \qquad 0 < t < \infty$$

3.3 Geometric Series

$$a + ar + ar^{2} + \dots + ar^{n} = \sum_{k=0}^{n} ar^{k} = a(\frac{1 - r^{n+1}}{1 - r})$$
$$a + ar + ar^{2} + \dots = \sum_{k=0}^{\infty} ar^{k} = \frac{a}{1 - r} \quad \text{for } |r| < 1$$

3.4 Series

$$\sum_{i=1}^{n} c = n.c$$

$$\sum_{n=0}^{N} c = (N+1).c$$

$$\sum_{n=-N}^{N} c = \sum_{n=0}^{2N} c = c(2N+1)$$

Shifting by adding the upper and lower bound by N

$$\sum_{i=1}^{n} i = \frac{n(n+1)}{2}$$
$$\sum_{i=1}^{n} i^2 = \frac{n(n+1)(2n+1)}{6}$$
